

A scatter plot showing the relationship between the Release Date (X-axis, ranging from 2023.0 to 2027.0) and the Performance Score (Y-axis, ranging from 0.0 to 1.0). The plot displays numerous AI models, each represented by a colored dot (red or blue) and labeled with its name. The models are distributed across the plot, with some showing high performance scores and others showing lower scores. The plot includes a grid and a legend indicating that red dots represent models with a performance score of 0.8 or higher, and blue dots represent models with a performance score of 0.7 or lower.

Model Name	Release Date (Approx.)	Performance Score (Approx.)
PromptCast	2023.2	0.85
Time-LLM	2023.7	0.95
UrbanGPT	2023.8	0.95
AutoTimes	2023.9	0.95

This scatter plot illustrates the growth of pretraining corpus sizes for time series foundation models from mid-2023 to early 2027. The y-axis, representing corpus size on a log scale, spans from 10⁵ to 10¹² data points. The x-axis shows the release date from 2023.5 to 2027.0. Most models are represented by blue dots, while TimeToolBench (TimeART) and StreamTSI-34K (TimeInteract) are shown in red. The data points are labeled with the model names, showing a clear trend of increasing corpus size over time.

Model	Release Date (Approx.)	Pretraining Corpus Size (Approx.)
Sentinel-2 Pixel TS (EarthPT)	2023.8	10 ¹⁰
TimesFM Corpus	2023.9	10 ¹¹
UTSD (Timer)	2024.1	10 ⁹
LOTSA (Moirai)	2024.1	10 ¹⁰
Causal-PT Prior Graphs	2024.1	10 ⁷
Time-series Pile (MOMENT)	2024.2	10 ⁹
Time-300B (Time-MoE)	2024.7	10 ¹¹
MERRA-2/ERA5 (Prithvi WxC)	2024.7	10 ¹¹
UTSD-3 (Sundial)	2025.1	10 ¹⁰
MillionST (TiMo)	2025.4	10 ⁶
TiRex Corpus	2025.4	10 ¹⁰
Toto Telemetry (Toto 1.0)	2025.4	10 ¹²
